North Pennine Birdwalks

Walk 5: Blanchland
Birds are very vulnerable to disturbance, especially during the breeding season. It is all too easy to inadvertently harm a bird or its young while trying to watch them.

For example, if an adult bird is prevented from returning to its nest, eggs or chicks may quickly chill and die. Straying from a footpath towards a nest site may also leave a scent trail that a predator is later able to follow.

To ensure that you enjoy watching birds without harming them or their young, please always follow this code of conduct:

• The welfare of the birds must come first. Disturbance to birds and their habitats should be kept to a minimum.

• Keep to footpaths, especially during the bird breeding season (March – August).

• Avoid disturbing birds or keeping them away from their nests for even short periods especially in wet or cold weather.

• Do not try to find nests. All birds, nests, eggs and young are protected by law and it is illegal to harm them.

• Keep dogs on a short lead.

• Leave gates and property as you find them.

• Take your litter home with you.
This short walk from the attractive and historic village of Blanchland combines both woodland and river habitats. Birds such as coal tit, goldcrest and dipper are active throughout the year. During the breeding season, more elusive species such as the pied flycatcher and spotted flycatcher can also be seen. Blanchland is sited within the remains of a monastery founded by Premonstratensian Monks in the 12th century. The Lord Crewe Arms hotel was originally built as the Abbot’s lodge, guest house and kitchens of the Abbey.
Easy Grade Walk
Suitable for most people: easy, comfortable walking, may be some stiles.

Medium Grade Walk
Typically a country walk with some hills, stiles and muddy paths.
Boots advised.

Hard Grade Walk
Hill walk. May have steep or strenuous climbs. Rough moorland.
Boots essential.

A guide is also provided to indicate the best times of year to see key bird species. This can be interpreted as follows:

BEST TIME TO VISIT

Blue shading indicates good months to see wintering birds
Orange shading indicates good months to see breeding birds
Green shading indicates good months to see birds on autumn or winter migration

Please be aware that the weather can change rapidly in the North Pennines. Always carry suitable wet weather clothing with you and remember that visibility will be poor at higher altitudes in low cloud conditions.

Walk Directions

From the car park, walk back through the village and go through the archway. Continue towards the bridge and just before it turn right and then left, through a small opening in the stone wall. The path now follows the riverbank, crossing a small footbridge and then several stiles.

On reaching the road at Baybridge, turn left, cross the bridge and take the footpath leading off to the left opposite the county boundary sign.

Follow this path, keeping the river on your left. Where the path forks on the edge of Blanchland take the right path which meets the road above a house.

Turn left and return to Blanchland.
Dipper and grey wagtail can be watched foraging in and beside the river. Look closely to see the dipper’s distinctive white eyelids.

Great spotted woodpecker, mistle thrush, long-tailed tit and siskin inhabit riverside woodland year round.

Watch out for red squirrels in woodland around Blanchland.

The North Pennines is one of England’s most special places – a peaceful, unspoilt landscape with a rich history and vibrant natural beauty. In recognition of this it is designated as an Area of Outstanding Natural Beauty (AONB). The area is also a Global Geopark – an accolade endorsed by UNESCO.

This short (1.5 mile) circular walk from the attractive North Pennine settlement of Blanchland combines an experience of both woodland and river habitats.
