NORTH PENNINES
One of the AONB family
Birds are very vulnerable to disturbance, especially during the breeding season. It is all too easy to inadvertently harm a bird or its young while trying to watch them.

For example, if an adult bird is prevented from returning to its nest, eggs or chicks may quickly chill and die. Straying from a footpath towards a nest site may also leave a scent trail that a predator is later able to follow.

To ensure that you enjoy watching birds without harming them or their young, please always follow this code of conduct:

- The welfare of the birds must come first. Disturbance to birds and their habitats should be kept to a minimum.
- Keep to footpaths, especially during the bird breeding season (March – August).
- Avoid disturbing birds or keeping them away from their nests for even short periods especially in wet or cold weather.
- Do not try to find nests. All birds, nests, eggs and young are protected by law and it is illegal to harm them.
- Keep dogs on a short lead.
- Leave gates and property as you find them.
- Take your litter home with you.
This walk offers both stunning views across the Nent Valley and the opportunity to experience a mix of typical North Pennines upland habitats: hay meadow, pasture and allotment, heather moorland, blanket bog and upland stream. Passing a derelict mine and many old mine shafts, it also typifies the historic lead mining landscape of the area.
Keys

**Easy Grade Walk**
Suitable for most people: easy, comfortable walking, may be some stiles.

**Medium Grade Walk**
Typically a country walk with some hills, stiles and muddy paths.
Boots advised.

**Hard Grade Walk**
Hill walk. May have steep or strenuous climbs. Rough moorland.
Boots essential.

A guide is also provided to indicate the best times of year to see key bird species. This can be interpreted as follows:

**BEST TIME TO VISIT**

- Blue shading indicates good months to see wintering birds
- Orange shading indicates good months to see breeding birds
- Green shading indicates good months to see birds on autumn or winter migration

Please be aware that the weather can change rapidly in the North Pennines. Always carry suitable wet weather clothing with you and remember that visibility will be poor at higher altitudes in low cloud conditions.

5 km (3 miles). Circular route

**Hard.** Part of the walk is across blanket bog and is wet and relatively rough terrain. Navigation may be difficult in misty conditions. This walk passes across an actively shot grouse moor so care should be exercised during the period August 12th to December 10th

In a small lay-by at NY769453

Pub and local shop in Nenthead (2.4 km)

Nenthead (NY781437)

Visit www.northpennines.org.uk for information on green places to stay
Walk Directions

• From the lay-by, follow the well-defined track leading up the hill through two large fields to a gate in the fell wall.

• Go through the gate and bear left to follow the well-defined track across the open moorland for 500m to the derelict remains of Wellhopehead Lead Mine.

• Keeping the mine and spoil heaps on your left, continue beyond the end of the gravel track onto a path. This is clearly marked by waist-high wooden poles at regular intervals.

• The path descends to cross the Wellhope Burn (take care!), stone steps having been provided on both sides. Follow the path up the hill to a waymark post at the junction of two paths. Turn right and then re-cross the stream.

• Follow the path for 650m across the moorland and blanket bog, following the wooden poles until the path re-crosses the fell wall through a gate.

• Descend through a large pasture for 500m to a point where the path forms a T-junction. Turn right and follow the path through a gate in a wall and into a small open conifer plantation.

• Beyond the plantation the path enters another pasture. Walk diagonally down the slope to a waymark post and then turn left, following a track down to meet the road.

• At the road, turn right and walk 300m back to the start of the walk.
Walk 9
Wellhope Moor

1. Grasslands fringing the heather moorland are excellent habitat for species such as meadow pipit, skylark and grey partridge.

2. Golden plover and red grouse are easy to see in this area. Take care not to disturb them.

3. The buds of cotton grass are an important source of food for black grouse in early spring.

4. Peat cut from North Pennine blanket bogs is thought to have been an important source of fuel for the early lead mining industry.

5. Open areas of plantation are good places to watch birds such as linnet, greenfinch, siskin and redpoll. Roe deer may also be seen here.

Together with the five waterproof route cards this booklet is the ‘Packhorse Trails: Five horse riding routes in the North Pennines’ guide. It includes: further details on the trails; background information on the special qualities of the North Pennines; and GPS waypoints. It also highlights providers of livery and stabling and places to eat and drink near the routes.

The North Pennines is one of England’s most special places – a peaceful, unspoilt landscape with a rich history and vibrant natural beauty. In recognition of this it is designated as an Area of Outstanding Natural Beauty (AONB). The area is also a Global Geopark – an accolade endorsed by UNESCO.

Set off on this glorious 3 mile, circular route, and you’ll be greeted by stunning views across the Nent Valley and the chance to experience a mix of typical North Pennines upland habitats – hay meadows, pasture and allotment, heather moorland, blanket bog and upland streams.
