The first settlement at Wearhead would undoubtedly have been a farmstead, possibly as a summer base for the Bishop’s cattle which would then be taken to lower ground to overwinter.

Wearhead stands at the head of the River Wear. The village is 1,104 feet above sea-level and lies to the southwest of Burnhope Seat which is 2,452 feet above sea-level.

As more meadow and grazing land was cleared, farming spread and, combined with the discovery of lead veins, the population increased.

If you look to the steep hillsides to the east of the village you will see evidence of shallow shafts and hushes which were the early methods used to extract lead and iron.

Follow the Mineral Valleys Walk signs.

In and Around Wearhead

**Other local attractions**

About a mile west of Wearhead is Burnhope Reservoir, which opened in 1937. The flooding of the Burnhope valley submerged six farm buildings and their outhouses. There is parking both ends of the dam and a permissive footpath provides a pleasant walk around the reservoir.

A MINERAL VALLEYS PROJECT WALK

Wearhead
The River Wear starts here

A VILLAGE WALK OFF THE WEARDALE WAY

A ½ mile stroll in upland countryside
The first settlement at Wearhead would undoubtedly have been a farmstead, possibly as a summer base for the Bishop's cattle which would then be taken to lower ground to overwinter.

Wearhead stands at the head of the River Wear. The village is 1104 feet above sea-level and lies to the southwest of Burnhope Seat which is 2452 feet above sea-level.

As more meadow and grazing land was cleared, farming spread and combined with the discovery of lead veins, the population increased.

If you look to the steep hillside to the east of the village you will see evidence of shallow shafts and hushes which were the early methods used to extract lead and iron.

In and Around Wearhead

1. Start at Wearhead Bridge and look west. The River Wear starts where Killhope Burn and Burnhope Burn join.

2. Take the footpath to the south of the bridge and follow Burnhope Burn in a westerly direction.

3. At the northern end of the footbridge, which crosses Burnhope Burn, bear right and follow the green lane footpath past the school.

4. After crossing the Killhope Burn at Westfall Bridge, turn right along Front Street for a pleasant village walk.

5. By the telephone box, take the bridleway on your right and you will find yourself walking along Killhope Burn before it joins Burnhope Burn to become the River Wear.

Other local attractions

About a mile west of Wearhead is Burnhope Reservoir, which opened in 1937.

The Reservoir is open for boating and fishing and there is a car park. There is a nature walk of approximately one and a half miles.

Burnhope Reservoir is a haven for wildlife, including grey heron, roe deer, common blue butterfly and primrose.
